

Advanced GIS Applications in Urban Planning

ArcGIS Urban Planning Workshop Project
Study Areas: Mashhad & Chenaran, Iran

Prepared by Samira Heydari | M.Sc. in Geography and Urban Planning | Tarbiat Modares University, Iran

Software & Tools: ArcGIS Pro | Spatial Analysis | Network Analysis | Buffer Analysis | Cartographic Design | Geodatabase Management

Project Overview

This portfolio project presents a selection of GIS-based urban planning analyses completed during an advanced ArcGIS workshop. It demonstrates practical applications of spatial analysis, urban mapping, accessibility assessment, land-use analysis, and professional cartographic design.

Project Objectives

- Develop GIS databases.
- Perform spatial analysis using ArcGIS.
- Produce professional thematic maps.
- Apply GIS techniques to urban planning.
- Prepare high-quality cartographic layouts.

Methodology

1. Data Collection & GIS Database Preparation
2. Data Processing
3. Spatial Analysis
4. Cartographic Design
5. Map Layout & Visualization
- 6.

Spatial Analysis Outputs

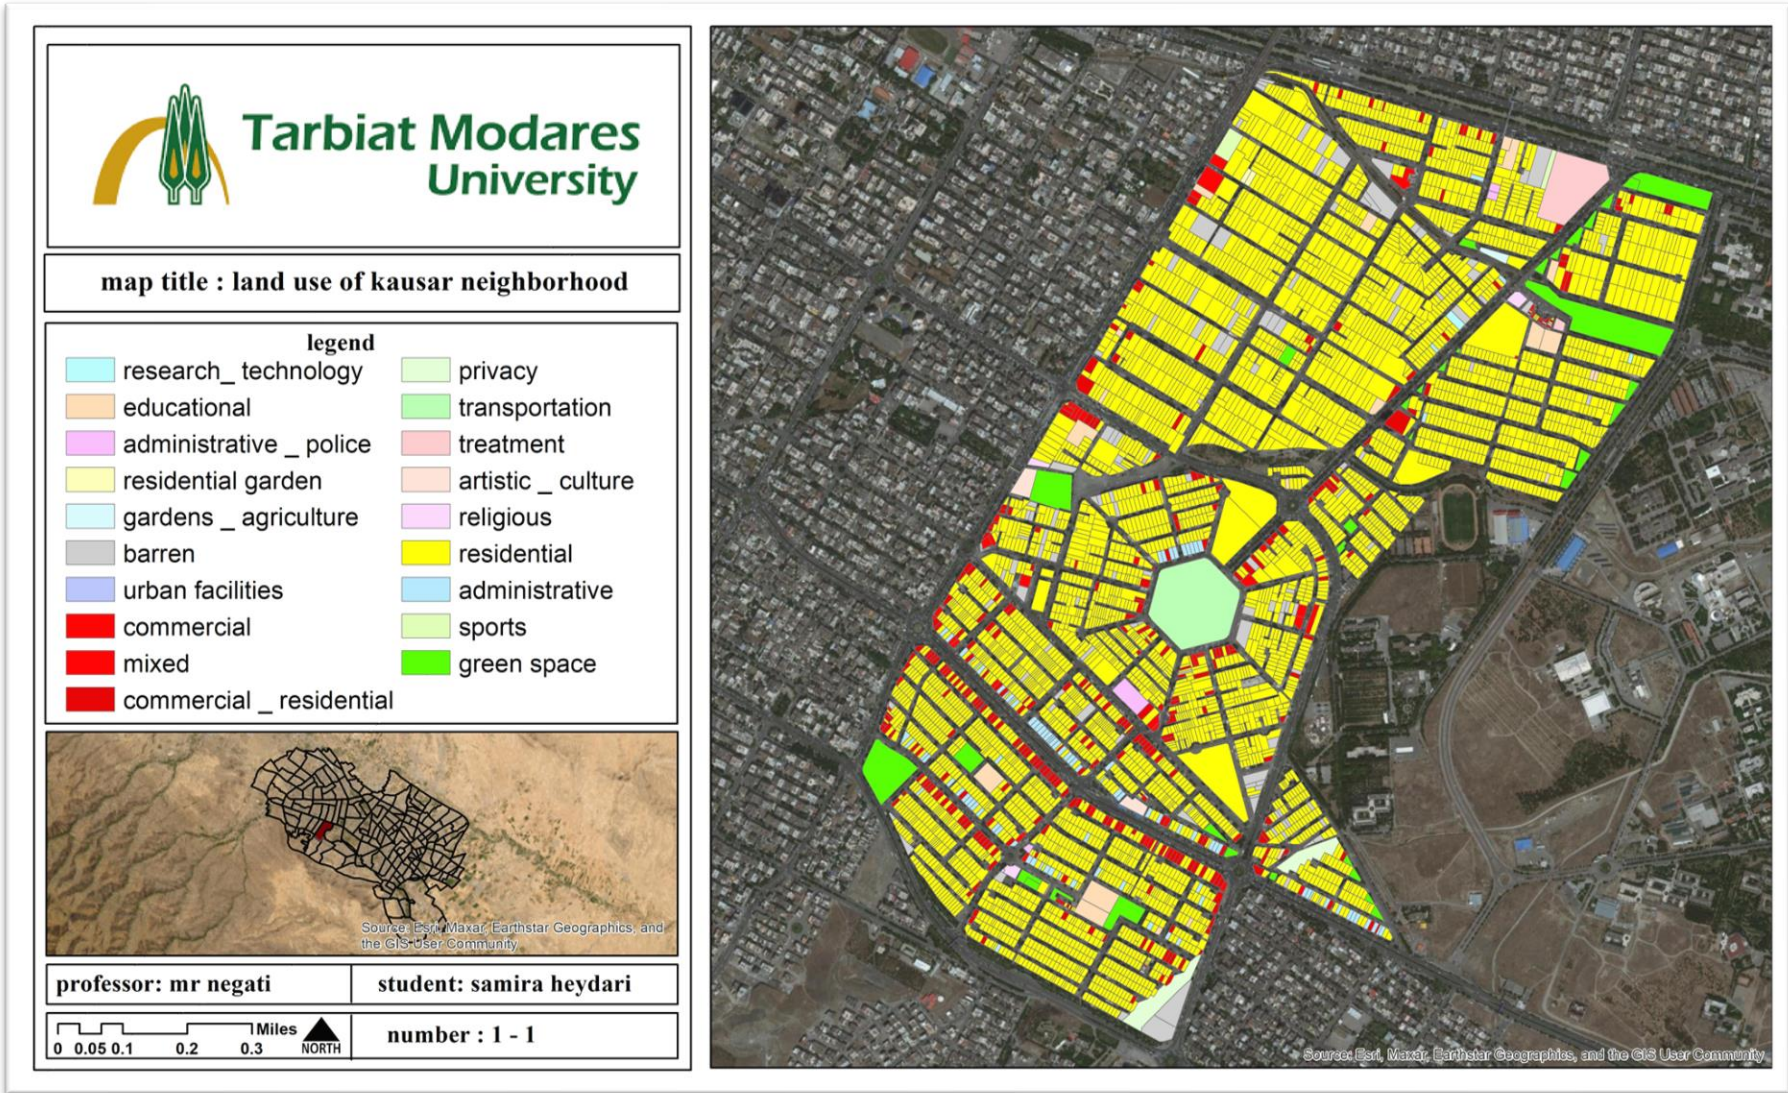

Figure 1. Land Use Map of Kosar Neighborhood

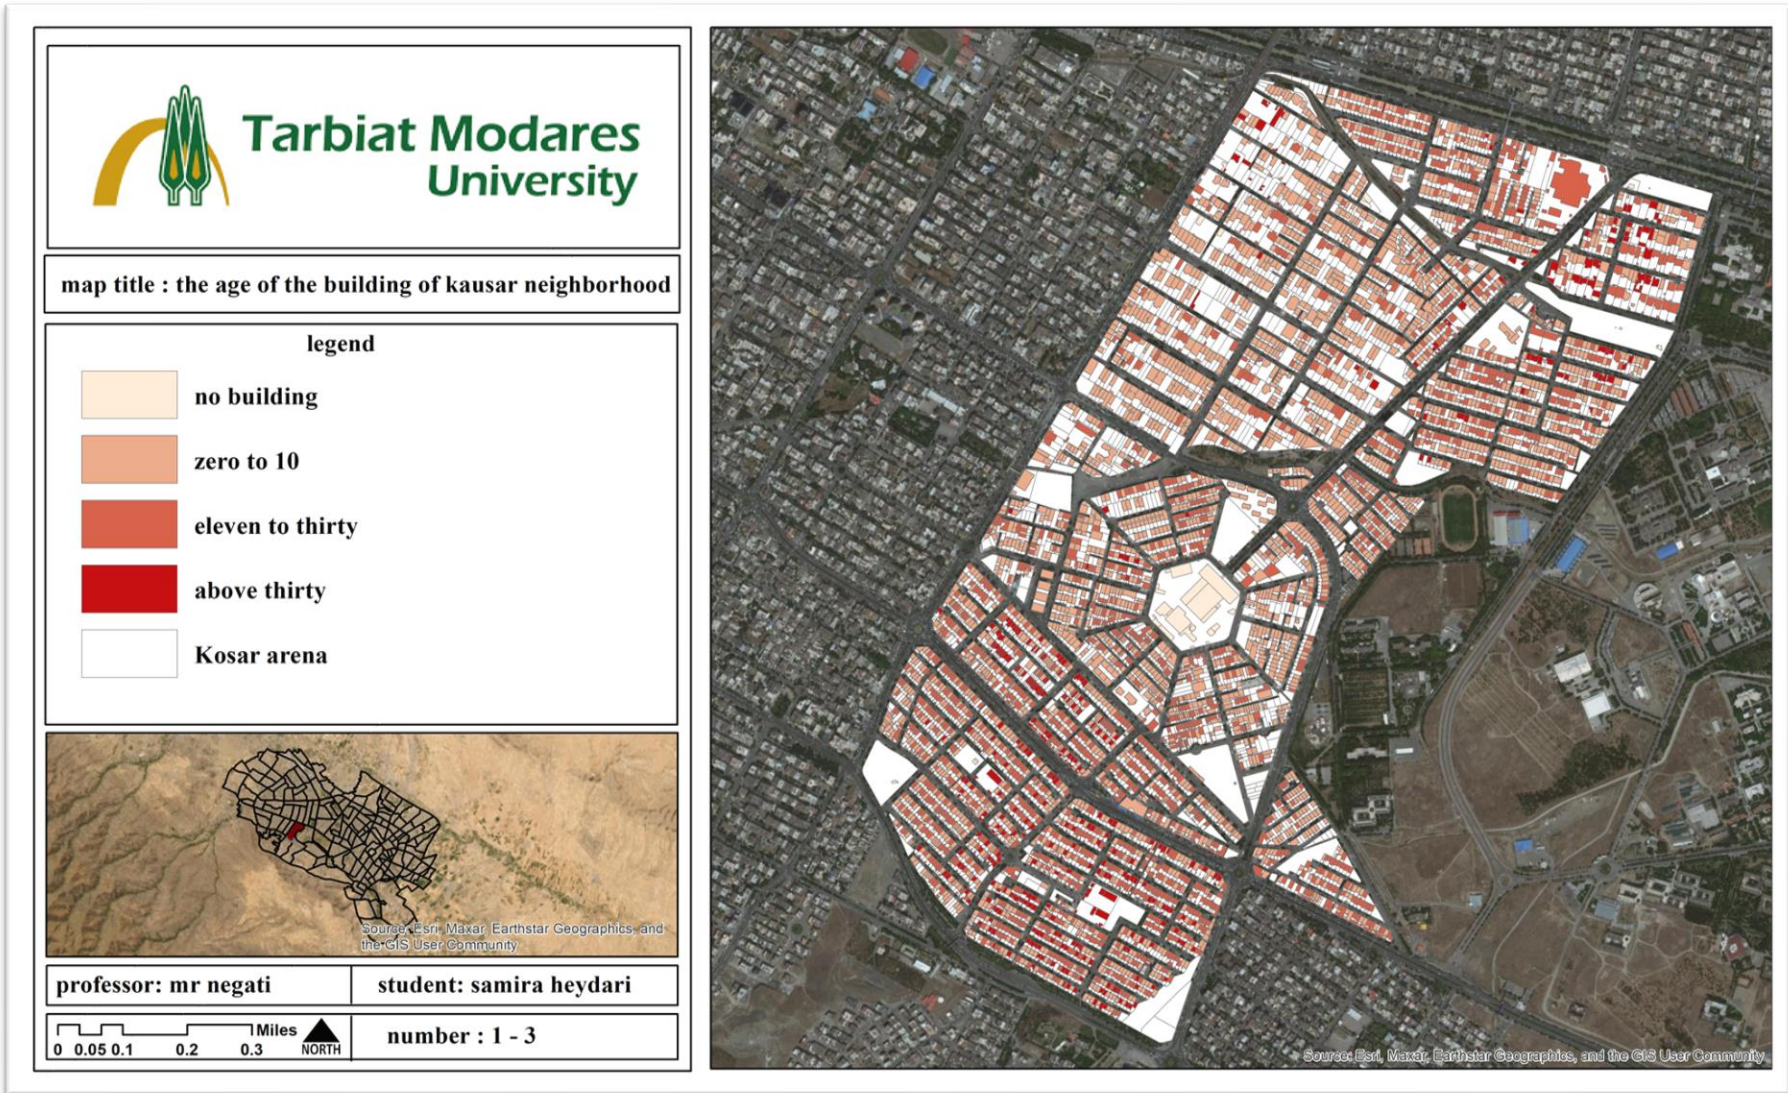

Figure 2. Building Age Assessment Map

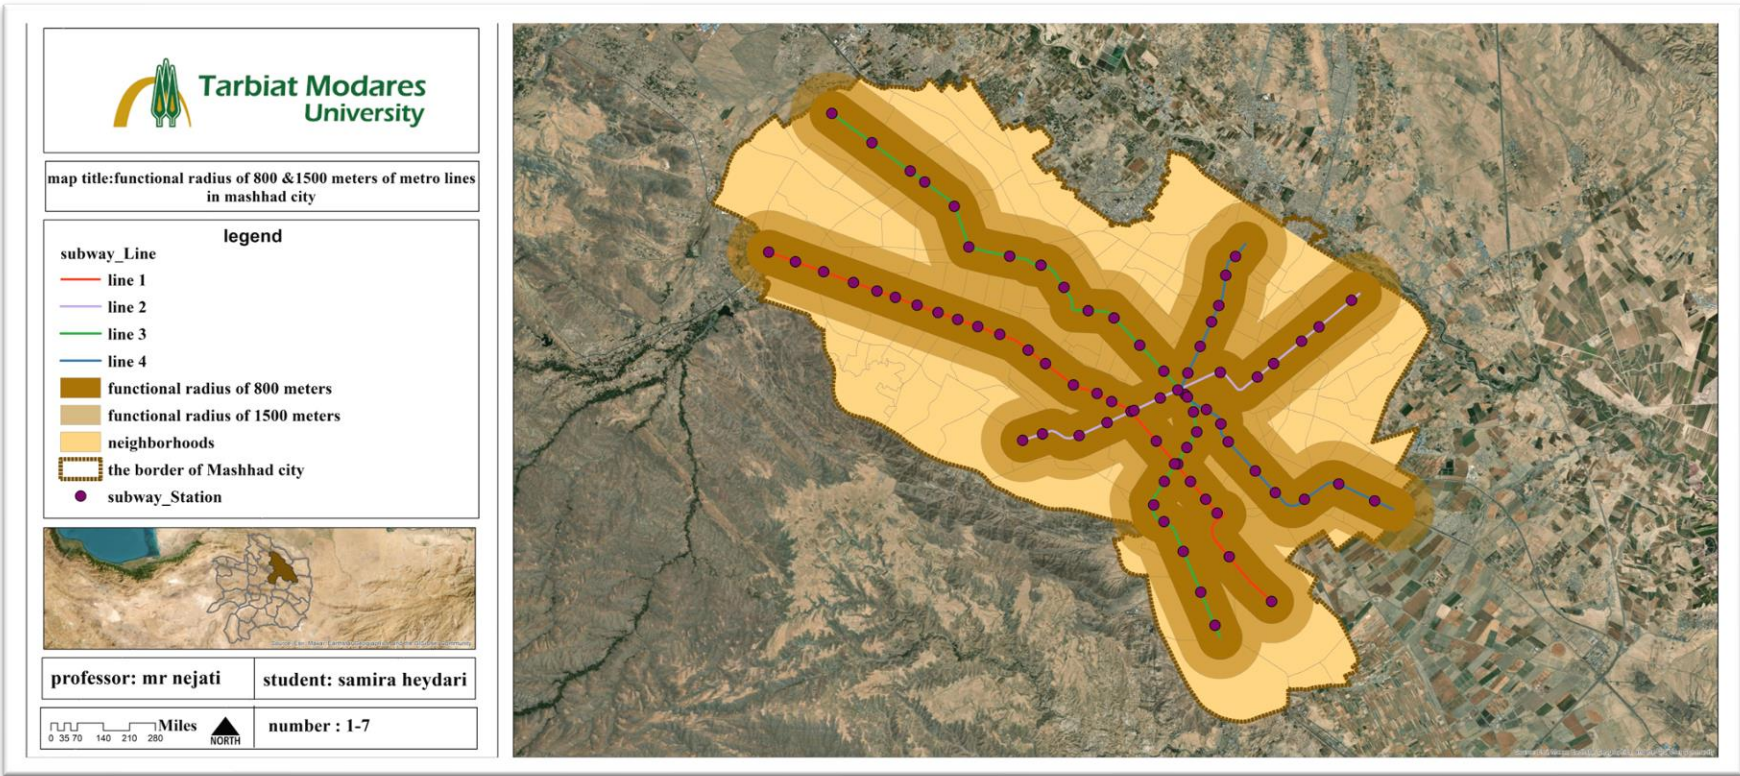

Figure 3. Metro Accessibility Buffer Analysis (800 m & 1500 m)

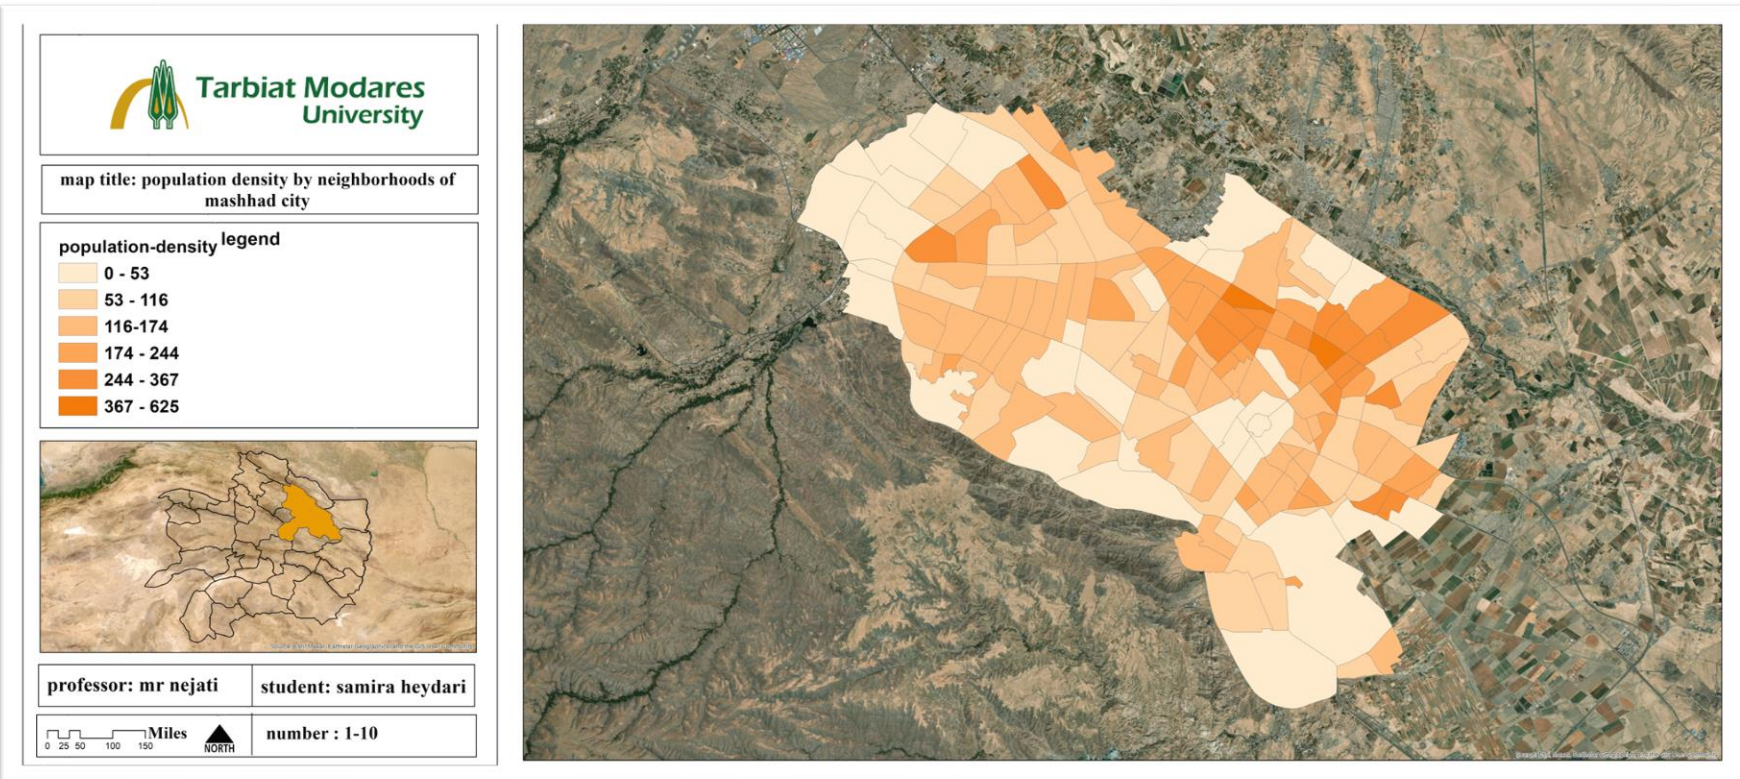

Figure 4. Population Density Map of Mashhad Neighborhoods

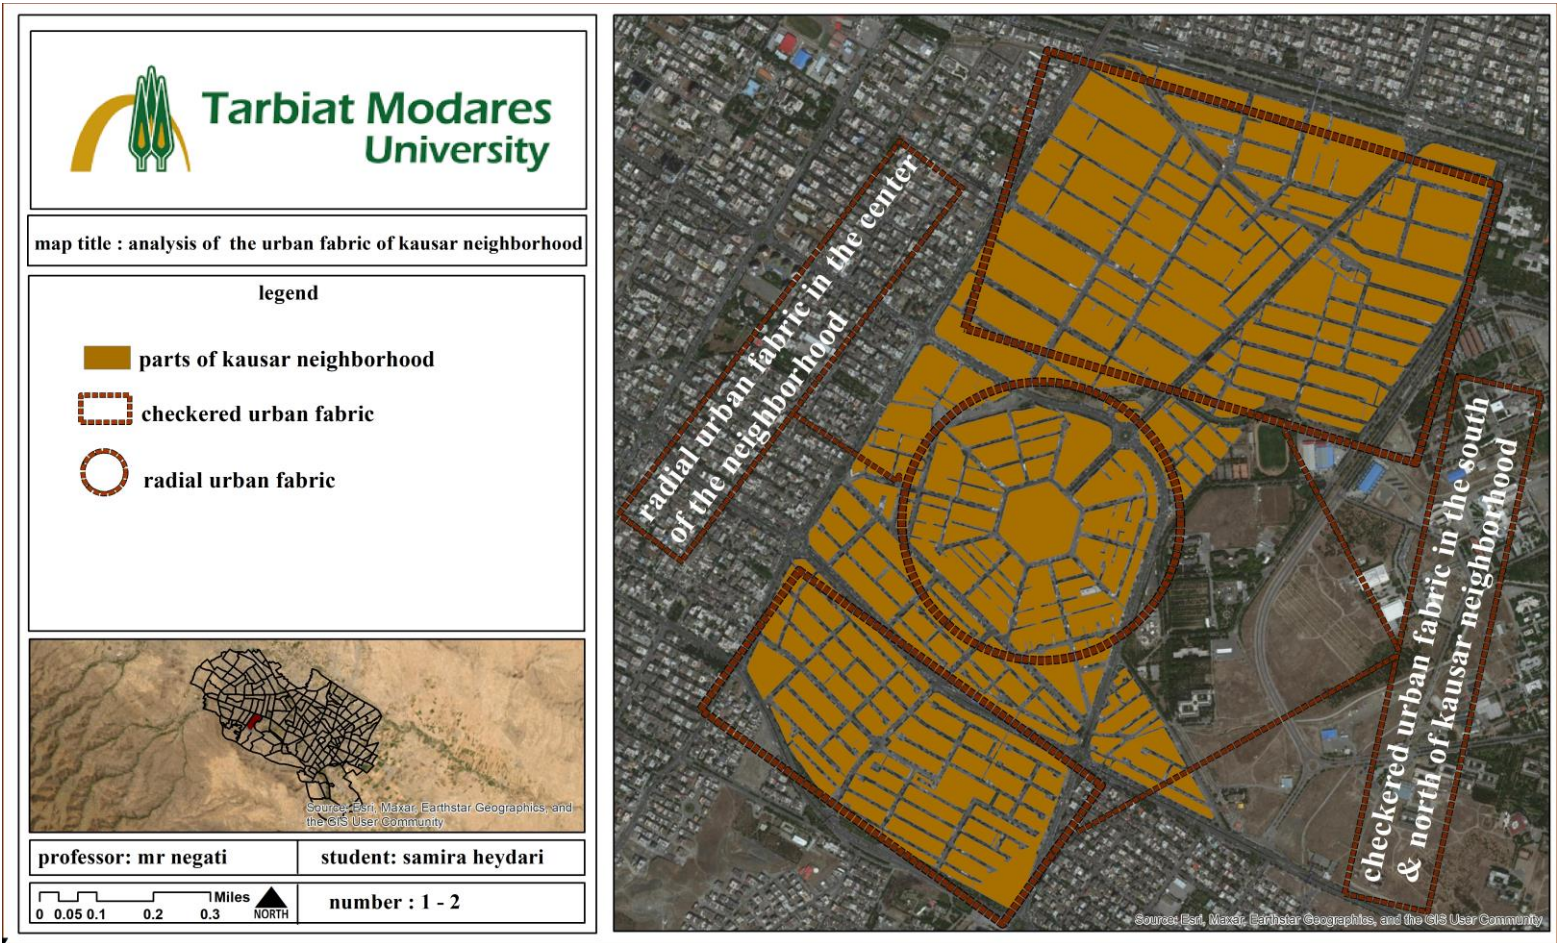

Figure 5. the urban fabric of kousar neighborhood

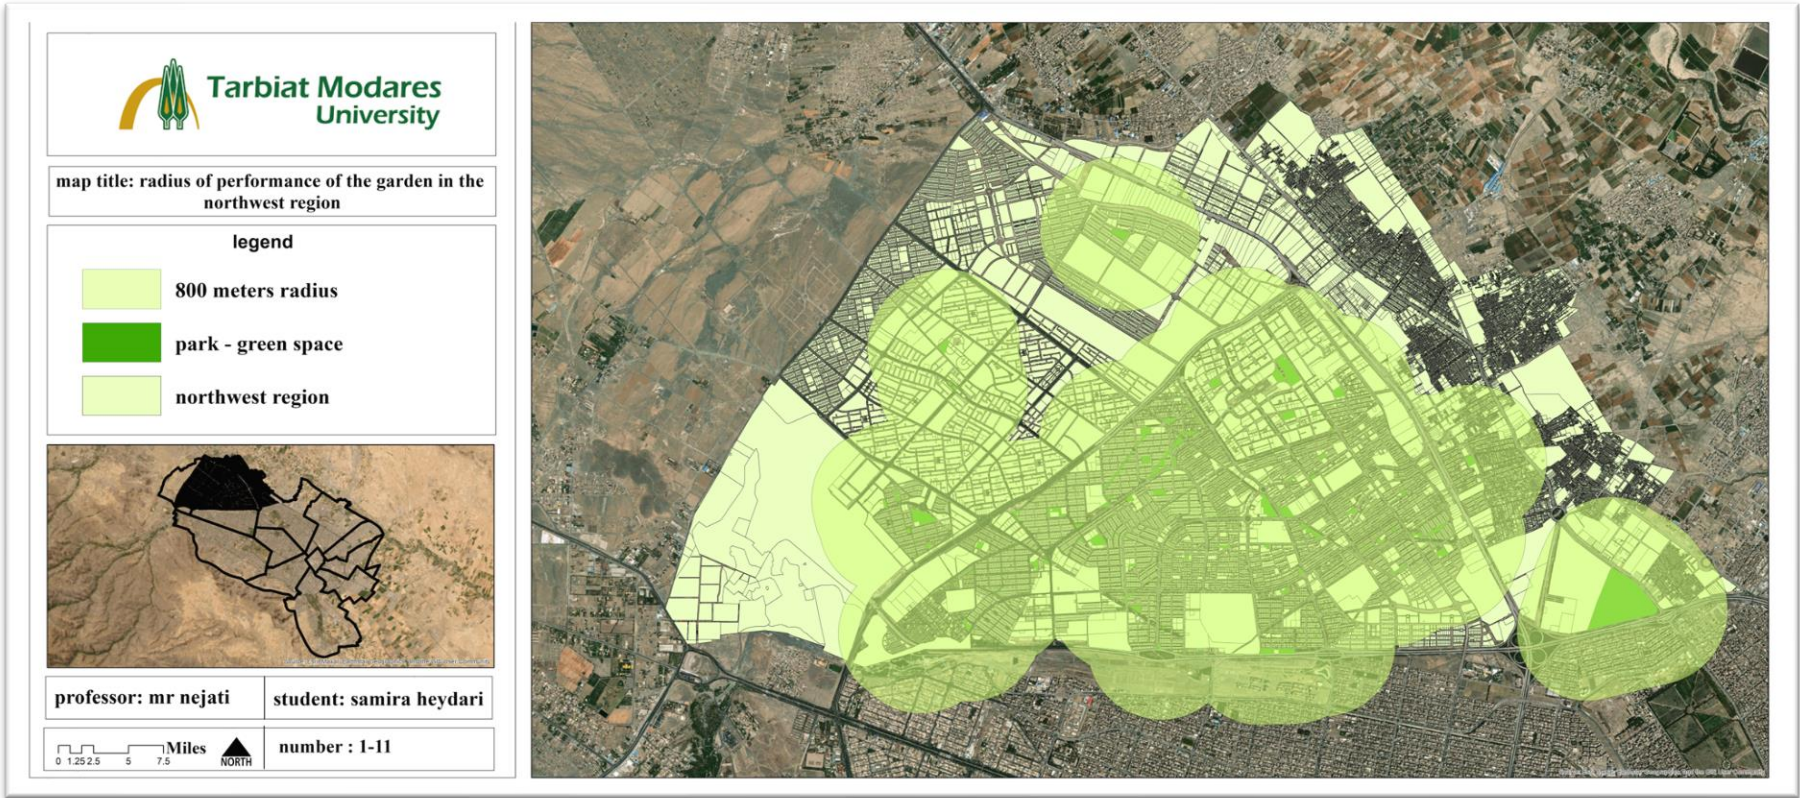

Figure 6. Park Accessibility Analysis

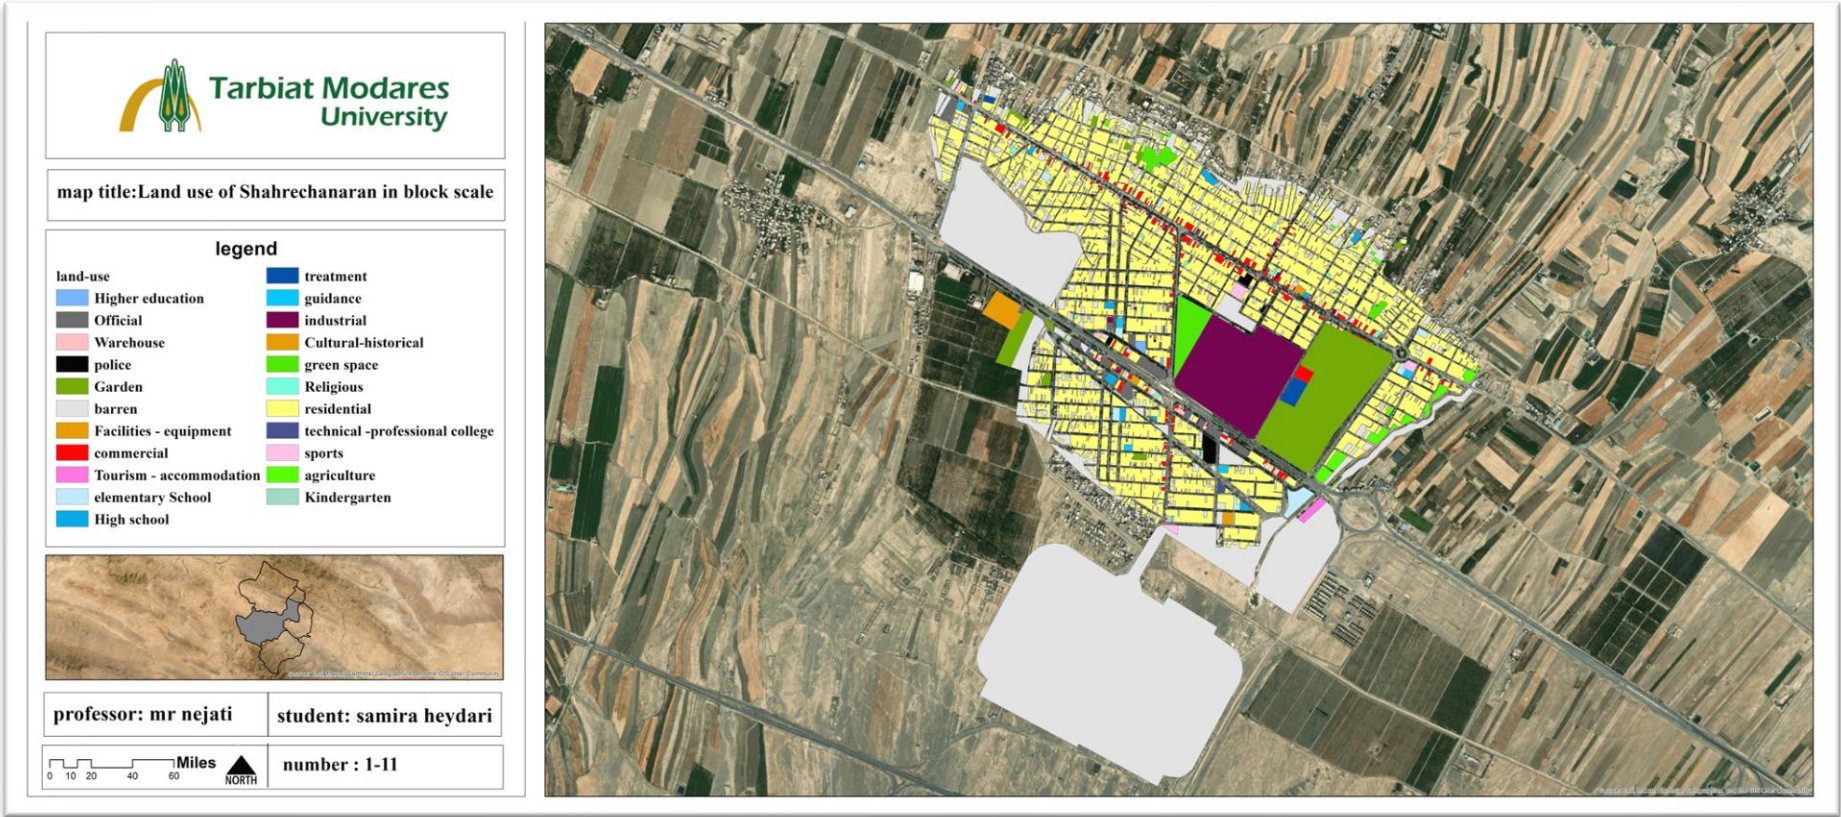

Figure 7. Land Use Map of Chenaran

Key Skills Demonstrated

- GIS Database Development
- Spatial Analysis
- Network Analysis
- Buffer Analysis
- Overlay Analysis
- Land Use Analysis
- Urban Accessibility Analysis
- Cartographic Design
- Thematic Mapping
- Geodatabase Management
